

Great Lakes Marsh Monitoring Program Volunteer Orientation & Training Session

Bird Studies Canada and Lambton Shores Phragmites Community Group, with support from Environment and Climate Change Canada, are working to expand the Great Lakes Marsh Monitoring Program in the Lambton Shores area.

We are seeking volunteers to be trained to monitor frogs and/or birds and who are willing to spend about 10 hours per year monitoring our local wetlands. Prior experience is not necessary. You can be part of the hundreds of volunteer Citizen Scientists throughout the Great Lakes basin of Ontario and the United States.

- ✓ Learn the techniques used in the nationally recognized Great Lakes Marsh Monitoring Program from the folks who coordinate it.
- ✓ Help advance the study and protection of marshes in *OUR* watershed.
- ✓ Contribute to understanding the effectiveness of invasive plant control for conserving local populations of threatened marsh birds and other wildlife.

**10 am to 3 pm on March 4, 2017 at the
Port Franks Community Centre
9997 Port Franks Rd, Port Franks, ON N0M 2L0**

**Space is limited, so please register as soon as possible by
February 27, 2017**

Contact Michelle Hay at michelle.hay16@gmail.com or 519-709-3328

Light Snacks and beverages provided but please bring your own lunch.
